Advisory Platform

1. Introduction

1.1 Project Overview

VisaConnect is a comprehensive AI-powered visa advisory platform that bridges the gap between visa applicants (customers) and certified immigration consultants (advisors). The platform enables customers to assess their visa eligibility using an intelligent AI engine, connect with qualified advisors, and receive end-to-end guidance through the visa application process. A centralized admin panel provides full oversight and control over all platform operations.

1.2 Goals & Objectives

- Provide customers with instant, AI-driven visa eligibility assessments across multiple destination countries.
- Create a trusted marketplace connecting visa seekers with vetted, specialist immigration advisors.
- Streamline the advisor discovery process through intelligent matching based on visa type, country expertise, language, and customer profile.
- Deliver a secure, scalable, and compliant platform meeting international data protection standards.
- Enable platform administrators to manage users, content, quality control, and revenue operations efficiently.

1.3 Target Audience

User Type	Description
Customers	Individuals or families seeking visa guidance for tourism, work, study, family reunification, or immigration purposes.
Advisors	Licensed immigration consultants, lawyers, or certified visa specialists offering professional advisory services.
Admins	Internal platform operators responsible for oversight, compliance, quality assurance, and platform management.

1.4 Scope

This document covers the full requirements for Version 1.0 of the VisaConnect platform, including:

- Customer-facing web application
- Advisor portal and profile management system
- AI-powered visa eligibility engine and advisor matching algorithm
- Real-time messaging and consultation booking system

- Admin control panel
- Payment and subscription management
- Notifications and communication infrastructure

2. User Roles & Permissions

2.1 Role Overview

Customer Visa Seeker	Advisor Immigration Expert	Admin Platform Operator
--------------------------------	--------------------------------------	-----------------------------------

2.2 Customer Role

Customers are individuals seeking visa guidance. After registering, they access the AI eligibility tool, browse advisor profiles, book consultations, and manage their visa journey through a personal dashboard.

Customer Permissions & Capabilities

- Register and manage a personal profile with identity and travel history
- Access the AI-powered visa eligibility assessment tool
- View AI-generated visa eligibility results and recommendations
- Browse, search, and filter advisor profiles by country, visa type, language, and rating
- View AI-generated advisor match scores and shortlists
- Book, reschedule, or cancel consultation appointments with advisors
- Communicate with advisors via built-in messaging
- Upload and share supporting documents securely
- Make payments for consultation sessions and document review services
- Leave ratings and reviews for completed advisor sessions
- Track application progress through a personalized visa journey dashboard
- Access a knowledge base of visa guides, FAQs, and country-specific requirements

2.3 Advisor Role

Advisors are verified immigration professionals who offer paid consultation services on the platform. They manage their public profiles, set availability, conduct consultations, and support customers throughout the visa process.

Advisor Permissions & Capabilities

- Register and build a detailed professional profile with credentials and expertise areas
- Submit verification documents (license, certifications, ID) for admin approval
- Set service offerings, consultation rates, and available time slots
- Receive and manage customer consultation requests and bookings
- Communicate with customers via in-platform messaging
- Receive and review AI-matched customer leads
- Upload templates, checklists, and visa preparation materials
- Track earnings, payout history, and performance analytics
- Manage a personal calendar with availability slots
- View customer-submitted documents and provide annotated feedback
- Request testimonials and respond to customer reviews
- Access platform resources and regulatory updates for advisors

2.4 Admin Role

Admins are internal platform operators with full access to all system areas. They manage user accounts, content, quality assurance, revenue, and platform settings.

Admin Permissions & Capabilities

- Full CRUD access to all customer and advisor accounts
- Verify, approve, reject, or suspend advisor profiles and credentials
- Moderate platform content including reviews, messages, and documents
- Manage visa information database (countries, visa types, requirements)
- Configure platform settings: commission rates, subscription tiers, and fees
- Access comprehensive analytics dashboards for platform performance
- Issue refunds, manage disputes, and handle escalated support tickets
- Send platform-wide or targeted notifications and announcements
- Manage SEO metadata, landing pages, and content blocks
- Generate financial, compliance, and operational reports
- Manage admin sub-roles and their individual access permissions

3. Functional Requirements

3.1 Authentication & Onboarding

3.1.1 Customer Registration & Login

- Email and password registration with email verification
- Social login via Google and Apple (OAuth 2.0)
- Multi-step onboarding: personal info → nationality & travel history → visa goals
- Two-Factor Authentication (2FA) via SMS or authenticator app
- Password reset via email with secure token expiry
- Session management with JWT tokens and refresh token rotation

3.1.2 Advisor Registration & Verification

- Dedicated advisor registration flow with professional detail collection
- Document upload for credential verification: immigration license, bar membership, certifications, government-issued ID
- Admin review and approval workflow with status notifications (Pending → Under Review → Approved / Rejected)
- Profile activation only upon successful verification
- Re-verification required if credentials are updated or expire

3.2 Customer Profile

- Full name, profile photo, nationality, date of birth, current country of residence
- Passport details (number, expiry — stored encrypted)
- Travel history: countries visited, prior visas held
- Educational background and employment status
- Financial overview (for visa eligibility assessment)
- Saved visa assessments and AI results history
- Consultation history with linked session notes and documents
- Wishlist of saved advisor profiles
- Notification preferences and communication settings

3.3 Advisor Profile

- Professional headshot, full name, and title/designation
- Bio and professional summary (up to 800 characters)
- Specialization: visa types (tourist, work, student, PR, family, investment, asylum, etc.)
- Country expertise: list of countries the advisor specializes in
- Languages spoken with proficiency level

- Years of experience and number of successful applications
- Certifications, licenses, and professional memberships (verified badges)
- Service offerings: document review, full consultation, application guidance, SOS review
- Pricing per service type with session duration
- Availability calendar (connected to booking system)
- Aggregate rating, total reviews, and individual review display
- Response time badge (e.g., responds within 2 hours)
- Advisor match score (shown to customers from AI engine)
- Public profile URL for sharing

3.4 AI Eligibility Assessment Engine

This is the core differentiating feature of the platform. The AI engine conducts a structured interview with the customer and evaluates their visa eligibility for a chosen country and visa type.

3.4.1 Assessment Flow

1. Customer selects destination country and visa type.
2. AI presents a dynamic questionnaire (15–30 questions) that adapts based on previous answers.
3. Questions cover: nationality, travel history, financial status, education, employment, criminal record, prior visa refusals, family ties, language proficiency, and purpose of visit.
4. Responses are collected, weighted, and scored against visa eligibility criteria.
5. AI generates an eligibility result with confidence score.
6. Result is displayed with a detailed breakdown and improvement tips.
7. AI recommends a list of best-matched advisors based on the customer's profile.

3.4.2 Assessment Output

Result Tier	Score Range	Recommendation
Highly Eligible	Score 80–100%	Strong application profile. Proceed with minimal guidance.
Likely Eligible	Score 60–79%	Good profile with some gaps. Advisor review recommended.
Borderline	Score 40–59%	Multiple weak points. Professional advisor strongly recommended.
Low Eligibility	Score < 40%	Significant barriers identified. Advisor consultation essential.

3.4.3 AI Advisor Matching Algorithm

Immediately following the eligibility assessment, the AI generates a ranked shortlist of advisors best suited to the customer's visa needs. Matching factors include:

- Country expertise alignment with chosen destination
- Visa type specialization match
- Customer's language preference vs. advisor's languages
- Advisor's success rate for similar customer profiles
- Advisor availability for upcoming sessions
- Advisor rating and review quality score
- Customer's budget range vs. advisor pricing
- Geographic region of customer (for time zone alignment)

3.5 Advisor Discovery & Search

- Keyword search across advisor names, bios, and specializations
- Filter by: country expertise, visa type, language, rating, price range, availability, verification status
- Sort by: AI match score, rating, price (low to high / high to low), response time, number of reviews
- Advisor listing cards showing key stats: rating, experience, price per session, languages, countries
- Advisor detail page with full profile, reviews, calendar, and booking CTA
- Featured advisors section on homepage (admin-curated or top-rated)

3.6 Consultation Booking System

- Real-time advisor availability calendar with time zone auto-detection
- Service type selection at booking: 30-min consultation, 60-min consultation, document review, SOS review
- Instant booking for advisors with open slots
- Payment collection at booking confirmation
- Automated booking confirmation emails with calendar (.ics) attachments
- Reminder notifications 24 hours and 1 hour before session
- Reschedule and cancellation policies configured per advisor (e.g., 24-hour notice)
- No-show and late cancellation handling with refund or credit rules

3.7 Communication System

3.7.1 In-Platform Messaging

- Threaded messaging between customers and their booked advisors
- Real-time message delivery with read receipts
- Rich text formatting, emoji support, and file/document attachments
- Message history preserved for 12 months post-consultation

- Admin ability to view flagged or reported conversations

3.8 Document Management

- Secure file upload for customers: passport, bank statements, employment letters, academic certificates
- Document categorization and labeling
- Advisor can request specific documents from customers via a document checklist
- Version control for uploaded documents
- Expiry date tracking for time-sensitive documents (e.g., passport expiry)
- Documents encrypted at rest and in transit (AES-256 / TLS 1.3)
- Document access strictly limited to assigned advisor and admin

3.9 Ratings & Reviews

- Post-session review prompt sent to customer 24 hours after consultation
- Star rating (1–5) across dimensions: expertise, communication, professionalism, value for money
- Written review with 500-character limit
- Advisor can respond publicly to reviews
- Admin moderation queue for flagged reviews
- Verified review badge for reviews from confirmed paying customers

3.10 Payment & Financials

- Secure payment processing via Stripe or equivalent gateway
- Platform commission deducted automatically per transaction (configurable by admin)
- Advisor payouts via stripe
- Customer invoices auto-generated per transaction
- Subscription tiers for customers: Free, Premium (access to more AI assessments, priority matching)
- Subscription tiers for advisors: Basic listing (free), Featured listing (paid)
- Refund management with admin override capability
- Transaction history and earnings dashboard for advisors

3.11 Notifications System

Notification Event	Recipient	Channels
Booking Confirmed	Customer + Advisor	Email,
Session Reminder	Customer + Advisor	Email,

New Message Received	Customer / Advisor	In-App, Email, Push
Advisor Verified	Advisor	Email, In-App
AI Assessment Ready	Customer	In-App, Email
Review Request	Customer	Email, In-App
Payment Processed	Customer + Advisor	Email, In-App
Payout Sent	Advisor	Email, In-App
Support Ticket Update	Customer / Advisor	Email, In-App
Account Suspended	Customer / Advisor	Email, In-App

4. Admin Panel Requirements

4.1 Dashboard Overview

- Real-time KPI widgets: total users, active advisors, daily sessions booked, platform revenue, pending verifications
- Charts: user registrations over time, bookings trend, revenue breakdown, AI assessment volume
- Recent activity feed: new registrations, flagged content, pending reviews, support tickets
- Quick action buttons: review pending advisors, view reported content, process refunds

4.2 User Management

4.2.1 Customer Management

- List view with search, filter by status, registration date, country
- View full customer profile, assessment history, bookings, and documents
- Manually verify, suspend, or permanently ban accounts
- Reset customer password or send unlock email
- Impersonate customer account for support purposes (logged action)

4.2.2 Advisor Management

- Verification queue: list of advisors pending review with document viewer
- Approve, reject (with reason), or request additional documents
- View advisor's full profile, earnings, session history, and customer reviews
- Manually edit advisor profile information
- Feature or un-feature advisors on the homepage
- Suspend or permanently remove advisor accounts with audit trail

4.3 Content Management

- Visa Information Database: add/edit/delete country profiles, visa types, requirements, fees, processing times
- Knowledge Base: create and manage visa guides, FAQs, and how-to articles
- Homepage management: configure featured advisors, promotional banners, and featured countries
- Blog and news section for visa-related updates and announcements
- Legal pages management: Terms of Service, Privacy Policy, Advisor Agreement

4.4 AI Engine Management

- Configure country-specific visa eligibility criteria and scoring weights
- Add, edit, or disable assessment questions per country/visa type
- Set threshold scores for eligibility tiers
- Configure advisor matching weights (can tune how much each factor influences match score)
- View AI assessment analytics: volume, pass/fail rates, drop-off points
- A/B test question variants for conversion optimization

4.5 Financial Management

- Transaction history with full detail: amount, parties, service type, date, status
- Configure platform commission rates per service type or advisor tier
- Process manual refunds with reason logging
- Manage advisor payout schedules and override individual payouts
- Configure subscription tiers and pricing for customers and advisors
- Revenue reports: daily, weekly, monthly, annual with export to CSV/PDF
- Dispute resolution center for payment-related issues

4.6 Support & Moderation

- Support ticket management with status tracking (Open, In Progress, Resolved, Escalated)
- Assign tickets to admin sub-users
- Review moderation queue for flagged reviews and messages
- Content removal with automated notification to the flagged party
- Advisor complaint log and formal warning system

4.7 Analytics & Reporting

- User analytics: acquisition sources, retention rates, geographic distribution

- Advisor analytics: top-rated advisors, earnings leaderboard, session completion rates
- AI analytics: assessment volume, eligibility distribution, advisor match CTR
- Financial analytics: gross revenue, net revenue after refunds, advisor payouts
- Engagement analytics: message volume, video call hours, document uploads
- Export all reports to CSV, Excel, and PDF formats

5. Non-Functional Requirements

5.1 Performance

- Page load time under 2 seconds on standard broadband (LCP < 2.5s)
- API response time under 300ms for standard requests
- AI eligibility assessment results returned within 5 seconds
- Platform must support up to 10,000 concurrent users at launch
- 99.9% uptime SLA with planned maintenance windows communicated 48 hours in advance

5.2 Security

- All data encrypted at rest (AES-256) and in transit (TLS 1.3)
- OWASP Top 10 vulnerability compliance
- Role-based access control (RBAC) with principle of least privilege
- Regular automated security scans and annual third-party penetration testing
- GDPR and applicable data privacy regulation compliance
- Secure document storage with access logging and audit trails
- Rate limiting, CAPTCHA, and DDoS protection on all public endpoints
- PCI-DSS compliance for all payment processing flows

5.3 Scalability & Infrastructure

- Cloud-native architecture deployable on AWS, GCP, or Azure
- Containerized microservices using Docker and Kubernetes
- CDN integration for static assets and media files
- Auto-scaling policies for peak traffic handling
- Separate environments: Development, Staging, Production
- Database replication with automated failover

5.4 Accessibility & Compatibility

- WCAG 2.1 Level AA compliance

- Fully responsive design for desktop, tablet, and mobile
- Cross-browser support: Chrome, Firefox, Safari, Edge (latest 2 versions)
- iOS and Android browser compatibility
- Support for right-to-left (RTL) languages for future localization

5.5 Localization & Internationalisation

- Initial launch in English
- Architecture designed for multi-language support from Day 1
- Currency display based on customer location with USD as base currency
- Time zone auto-detection for booking and session management

6. Technology Stack Recommendations

Layer	Technology	Rationale
Frontend	Next.js	SSR for SEO, fast page transitions, component-based UI
Backend	Node.js (Express) or Python (FastAPI)	RESTful APIs with WebSocket support for real-time features
AI Engine	OpenAI GPT-4 / Custom ML Model	Dynamic questionnaire, eligibility scoring, advisor matching NLP
Database	PostgreSQL + Redis	Relational data + caching layer for performance
File Storage	AWS S3 + CloudFront	Secure document storage with CDN delivery
Payments	Stripe	PCI-DSS compliant payment processing and payouts
Email / SMS	SendGrid + Twilio	Transactional emails and SMS notifications
Auth	Auth0 / Supabase Auth	OAuth2, JWT, MFA, social login
Hosting	AWS / Vercel + Kubernetes	Scalable cloud infrastructure with CI/CD pipelines
Monitoring	Datadog / Sentry	Error tracking, performance monitoring, alerting

7. Key User Stories

7.1 Customer User Stories

ID	User Story
CS-001	As a customer, I want to take an AI assessment so that I know if I am eligible to apply for a UK Skilled Worker visa before paying for an advisor.
CS-002	As a customer, I want to see a ranked list of advisors matched to my profile so I can quickly find the most relevant expert.
CS-003	As a customer, I want to book a video consultation with an advisor and pay securely within the platform.
CS-004	As a customer, I want to upload my documents securely and share them only with my chosen advisor.
CS-005	As a customer, I want to receive reminders before my consultation session so I am never late.
CS-006	As a customer, I want to leave a review after my session so other customers can benefit from my experience.
CS-007	As a customer, I want to track my visa application progress through a personal dashboard.

7.2 Advisor User Stories

ID	User Story
AS-001	As an advisor, I want to build a detailed profile so customers can understand my specializations and trust my credentials.
AS-002	As an advisor, I want to set my availability in a calendar so customers can book me at times that suit me.
AS-003	As an advisor, I want to receive AI-matched customer leads relevant to my expertise so I can focus on the right clients.
AS-004	As an advisor, I want to view a customer's AI assessment results before our session so I can prepare effectively.
AS-005	As an advisor, I want to track my earnings and payout history in a clear dashboard.
AS-006	As an advisor, I want to send document request checklists to customers so I get all necessary files before our consultation.

7.3 Admin User Stories

ID	User Story
ADM-001	As an admin, I want to review and verify advisor credentials so only qualified professionals are listed on the platform.
ADM-002	As an admin, I want to configure AI eligibility scoring criteria per visa type so assessments are always accurate and current.
ADM-003	As an admin, I want to view comprehensive analytics so I can make data-driven decisions about platform growth.
ADM-004	As an admin, I want to manage the visa information database so customers always see up-to-date requirements.
ADM-005	As an admin, I want to handle payment disputes so customers and advisors both feel protected.

8. Development Phases & Milestones

9. Assumptions, Constraints & Risks

9.1 Assumptions

- Advisors are responsible for maintaining valid professional credentials and licenses.
- The platform does not provide legal advice; it facilitates connections between users and licensed professionals.
- AI eligibility results are indicative only and not legally binding visa outcome guarantees.
- All user content and reviews must comply with the Platform's community guidelines.
- Third-party service providers (Stripe, Twilio, video SDK) will maintain their SLAs.

9.2 Constraints

- The AI engine must be designed to comply with data minimization principles under GDPR.
- Platform must not store passport full numbers in plain text at any point.
- Advisor verification must be manual for Version 1.0 (no automated credential verification API).
- Video consultation sessions must not be recorded without explicit bilateral consent captured within the platform.
